Full-Stack Web Developer, currently a frontend developer at ManaJoy building a nationwide marketplace and its admin panel with React, Next.js and TypeScript. Beyond my job I've shipped nine production-grade full-stack applications end-to-end — and I don't just write them, I deploy and operate them: each runs on my own VPS with Docker, Nginx, PostgreSQL and automated HTTPS. One, a live-teaching platform, has a paying client. I'm fluent in multi-tenant schemas, RBAC, JWT, real-time features, escrow flows and OAuth, and I care about clean architecture, security and actually shipping.

Building the customer-facing marketplace and internal admin panel for a nationwide platform (discounts, stores, services, loyalty). Product and store catalogs, "nearby stores" maps and geolocation via MapLibre GL, order tracking, loyalty/points and reservation flows. Working within a team led by a project manager.
