Full-Stack Web Developer with a portfolio of seven production-grade applications spanning healthcare, e-commerce, education, freelance marketplaces, travel planning, team collaboration, and library management — each architected and built end-to-end. I design multi-tenant database schemas with 50+ models, build RBAC-protected REST APIs with JWT and refresh-token rotation, and ship polished React frontends with real-time features, OTP authentication, OAuth, and escrow payment flows. I learn fast, take ownership of every line I ship, and care deeply about clean architecture, security, and user experience.
