Full-Stack Web Developer currently working as a frontend developer at ManaJoy, building a real, nationwide marketplace and its internal admin panel with React, Next.js and TypeScript. Alongside my job I built and shipped the wisar.uz learning platform, plus seven more production-grade full-stack applications end-to-end — spanning healthcare, e-commerce, education, freelance marketplaces, travel, team collaboration and library management. Comfortable with multi-tenant database schemas, RBAC, JWT, real-time features, escrow flows and OAuth. I care deeply about clean architecture, security and user experience.

WORK EXPERIENCE

ManaJoy — Frontend Developer May 2026 — Present

Building the customer-facing marketplace and internal admin panel for a nationwide platform (discounts, stores, services, loyalty). Product and store catalogs, "nearby stores" maps and geolocation via MapLibre GL, order tracking, loyalty/points and reservation flows. Working within a team led by a project manager.
